

DAY 9 - SUMMARY

1. Right Angle Triangle Pattern

Prints stars in increasing order, where each row contains the same number of stars as its row number.

```
for i = 1 to n
  for j = 1 to i
    print "*"
  print new line
```

2. Triangle (Pyramid) Pattern

Prints a centered pyramid by decreasing spaces and increasing stars in each row.

```
for i = 1 to n
  print (n - i) spaces
  print (2 * i - 1) stars
  print new line
```

3. Hollow Pyramid Pattern

Prints only the boundary stars of a pyramid, leaving the inside empty.

```
for i = 1 to n
  print (n - i) spaces

  for j = 1 to (2 * i - 1)
    if j == 1 OR j == (2 * i - 1) OR i == n
      print "*"
    else
      print space

  print new line
```

4. Reversed Hollow Pyramid Pattern

Prints an inverted hollow pyramid where stars appear only on the boundary.

```
for i = n down to 1
  print (n - i) spaces
  for j = 1 to (2 * i - 1)
    if j == 1 OR j == (2 * i - 1) OR i == n
      print "*"
    else
      print space

  print new line
```
